

Sno-kones make cool party treats

SNO-KONE MACHINES ARE EASY TO USE AND EASILY ATTRACT A CROWD!

What a great way to entertain the kids!
Call your area A.R.A.-affiliated party rental pro to rent a Sno-kone machine for your next school event or outdoor party on a hot summer day. Kids love Sno-kones - and so do adults!

KNOW THE MACHINE

Easy to operate - easier to rent.

A Sno-kone machine is equipped with:

- 110-volt, single-phase, 60-cycle, AC-current motor with toggle switch, shaving unit, dispensing case and separate light switch inside the case
- Cutterhead mounted on the end of the motor shaft inside the shaver body (gooseneck)
- Pusher handle presses the ice against the revolving cutterhead to produce shaved ice

Note: The machine must be properly grounded to prevent electrical shock

USEFUL TIPS FOR OPERATION

Your guide to Sno-kone success.

To make the best Sno-kone:

1. Start the motor and fill the shaver body, often called the gooseneck, an inch from the top with ice cubes or 3" x 4" pieces of ice. The larger the ice pieces, the better the snow
2. Push ice down against the cutterhead with firm pressure. Too much pressure results in coarse ice; too little makes ice mushy
3. Do not force the handle
4. A surface temperature of 150-degrees F. is normal
5. To prevent damage to blades, insert only ice in the gooseneck
6. To prevent injury, keep fingers away from the shave body when motor is running

CLEANING INSTRUCTIONS

It's a snap!

1. Unplug the machine
2. Wipe all surfaces clean to avoid cleaning charges

Consult your rental center for additional equipment and accessories for your event!
